**REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1-10, wherein the claimed invention comprises wherein  $| (z_b - 0.6w_b) - (z_g + 1.2) | \leq 1$  is met, where a coordinate system has an origin at an intersection between the center axis and a surface the optical element, which surface faces direction opposite to the gravity direction, and sets axis be positive in the direction opposite the gravity direction of the center axis,  $z_g$  is a coordinate of a gravity center of the optical element in the Z coordinate system,  $z_b$  is a coordinate of a center position of a width of said joint member in the axis direction by which said joint member contacts the optical element in the Z coordinate system, and  $w_b$  the width of said joint member in the z axis direction by which said joint member contacts the optical element, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly-labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2873
